

Mike McGranahan ▪ mike@mcgwiz.com ▪ Los Angeles

CORE VALUES ▪ customer focus, teamwork, ownership, sustainability, empathy

Flexible engineering leader combining 20+ YOE and technical expertise with human and agentic leadership to aggressively deliver complex, impactful solutions. I evaluate tools by comparing their abstractions with business needs, then leverage them to create “pits of success”.

EXPERIENCE

Dec 2023 to present ▪ Engineering Manager, **Saviynt** ▪ *identity governance SaaS*

TypeScript, React, microfrontend, Playwright, axe-core, GitLab CI/CD, kubernetes, AI agent

- Standardized AI assistance by setting repo expectations and authoring common docs
- Drove product team alignment on AI spec-driven process and architected internal tools
- Leveraged LLM agentic loops including Kiro, Claude Code, Gemini/Antigravity, Windsurf, and Cursor, to address highest-risk platform security and performance fixes including CSP headers, HttpOnly auth cookies, MFA and e-auth frameworks, caching
- Scaled team by creating formal and informal lead roles, empowering employee decision-making, and hosting an efficient set of meetings and protocols to ensure alignment
- Architected microfrontend (MFE) framework within existing infrastructure, supporting versioning, shared code, and CloudFlare distribution, to decouple and accelerate teams
- Reduced contract risk by automating accessibility testing with Playwright, axe-core, msw
- Documented expectations with interviewing, onboarding, working, and technical guides
- Mandated quality gates for unit tests (testing trophy), linting, code reviews, type checks
- Met vastly increased needs by growing UI Team from 4 to 17 engineers (US and India)

Oct 2022 to Dec 2023 ▪ Sabbatical ▪ *career break for full-time parenting*

Nov 2019 to Sep 2022 ▪ Multiple roles, **ServiceTitan** ▪ *trades industry operations SaaS*

TypeScript, C#, React, MobX, SQL Server, Cordova, Kibana, microservices, ASP.NET Core

Jan 2021 to Sep 2022 ▪ Engineering Manager

- Invested in refactor, optimization of the most utilized, feature-dense screen for 35k DAU
- Doubled output by coaching junior devs to operate with ambiguity and swarm on tasks
- Setup long-term success with DDD/BDD training, and splitting team to two subdomains
- Managed risk by structuring development plans around critical and stretch phases
- Created and ran cross-training program for SDETs seeking to transition to SWEs

Nov 2019 to Jan 2021 ▪ Staff Software Engineer / Lead Engineer

- Solved severe UX pain points by leading extensive refactoring of core scheduling tables

Mike McGranahan

- Halved sprint carryover by rebooting Scrum to properly track emergent work
- Led prototypes of CQRS read replica and dev-friendly SqlKata queries to avoid slow ORM

Mar 2018 to Sep 2019 ▪ Head of Engineering, **Reasi** ▪ *seed-stage blockchain escrow*

TypeScript, Node.js, React, PostgreSQL, Docker, Jest, AWS ECS, Koa, Ethereum, Circle CI

- Leveraged Dwolla banking/IDV, Ethereum smart contracts, PDF generation, DocuSign
- Rearchitected codebase into monorepo with containers, linting, structured migrations
- Devised recruiting process to minimize bias and attract high-quality candidates
- Platform/infra contributions: homegrown ngrok alternative, RSA/AES hybrid encryption, PostgreSQL distributed locking and message queue, JavaScript Proxy dirty-checking

Aug 2016 to Mar 2018 ▪ Senior Instructor, **Sabio** + Adjunct Faculty, **Antioch University**

C#, Node.js, React, Bootstrap, ASP.NET MVC, Express, SQL Server, MongoDB, Angular, EF

- Created accredited courses and ran real MVP projects for C# and Node.js bootcamp
- Mentored diverse junior developers and newcomers to achieve 90% 6-month hire rate

Apr 2014 to Jun 2016 ▪ Web Developer, **Stack Overflow** ▪ *Q&A forum for developers*

C#, SQL Server, A/B Testing, Redis, Elasticsearch, Backbone.js, ASP.NET MVC, GitLab

- Overhauled core ecommerce system for UX experimentation, technical debt, testability
- Designed A/B experiments to optimize purchase flow and job search status freshness
- Mentored junior women developers in partnership with Flatiron School, Girl Develop It

Apr 2012 ▪ Founder **Blocvox** ▪ C#, MongoDB, Azure, CI/CD, RequireJS, Linux, Node.js

Isomorphic SPA with REST API, CQRS architecture, and distributed MongoDB data stor

Jun 2010 ▪ Consultant **LAB49** ▪ C#, SSAS OLAP, Java, WPF, WebSockets, Selenium, Node.js

Led streaming finance projects for global investment banks with offshore teams

Oct 2008 ▪ Software Engineer **GameFly** ▪ C#, ASP.NET MVC, Lucene, Ruby, NHibernate, TFS

Modernized company tech stack to improve stability, maintainability, test automation

Jan 2007 ▪ Lead Developer **Reborn Studio** ▪ C#, jQuery, WebForms, SVN, SQL Server, C++

Established coding standards; led development of social, video, geographic search apps

Aug 2004 ▪ Programmer/Analyst II **UCLA** ▪ VB, C#, JavaScript, jQuery, WinForms, ASP

Developed SOAP web services for gradebook management, Exchange calendaring

EDUCATION

UCLA, B.A. Political Science, 50% of B.S. Computer Science and Engineering program

Certified ScrumMaster
